Experience

Salesforce

Hyderabad, India

Member of Technical Staff

Aug 2022 – Present

- Designed and developed backend services for loyalty transaction **traceability**, supporting enterprise loyalty programs operating at **530M+** transaction-record scale annually and enabling auditability of member point adjustments, settlements, cancellations, and transfers.
- Owned enhancements and scalability improvements for core **Loyalty Management Invocable Actions** including Credit Points, Redeem Points, Cancel Accrual, and Cancel Redemption, collectively supporting approximately **2M** executions per day across enterprise customer workflows.
- Built AI-powered Agentforce agents for dynamic loyalty promotion ranking and member currency adjustments, enabling personalized promotion experiences for approximately **4M** loyalty members and supporting nearly **5K** adjustment executions per day.
- **Spidering**: Performed spidering on Expression Sets to auto-include Decision Matrices, Decision Tables, Contexts, and other dependencies during packaging and deployment.
- **Expression Set APIs & Context Definition Integration**: Implemented context definition and tag validations across Expression Set backend, Metadata API, and Connect API; developed CRUD Connect APIs with end-to-end Metadata integration, call rate guardrails, and QA validation.
- **Context Rules**: Designed and developed design-time APIs for rule libraries, rules, and rulesets within the BRE; simulated runtime context rules use-cases for UPS and PCM.
- **BRE Stabilization & Support**: Stabilized BRE Decision Matrix and Expression Set Templates via bug fixes and cross-team blitz sessions; led cloud-wide office hours for effective product query resolution.
- **Decision Table & Expression Set Near Core**: Delivered Sync and Purge functionality with full-stack implementation across Core and Near Core systems; refactored ES runtime execution into a dedicated microservice.

Associate Member of Technical Staff

Feb 2021 – Aug 2022

- **Decision Matrix & Expression Set Clone**: Implemented end-to-end cloning of decision matrix versions and expression sets, including a custom Salesforce LWC modal component, backend processing, and BRE validations.
- **File-Based Rules Support in Salesforce Core**: Built complete support for file-based expression sets using transformation APIs (Metadata API ↔ Connect API) for saving and extracting rules from Salesforce Core.

Infoedge India Limited (Naukri.com)

Noida, India

Software Development Engineer

Aug 2020 – Feb 2021

- **PII Microservice**: Complete system design and implementation for protecting PII in encrypted format using Amazon KMS for envelope encryption.
- **Institutes & Courses REST API**: Created REST APIs for complex queries on courses, institutes, and specializations using advanced data structures.
- **Certification Service**: End-to-end microservice design and implementation including DB schema design and APIs for adding Certifications on Naukri.com user profiles.

Technical Skills

Languages: Java, Python, C++, SQL, HTML/CSS, JavaScript, Dart

Frameworks & Libraries: Spring Boot, Hibernate, Flutter, FastAPI, React, LangChain, LangGraph, CrewAI

Developer Tools: Git, VS Code, Android Studio, Jenkins, JIRA, Docker, Kubernetes

Cloud & Platforms: Salesforce (LWC, Agentforce, BRE, Metadata/Connect API), Google Cloud, Amazon KMS

AI/ML: LLM Integration, RAG, ChromaDB, MCP, Google ADK, Gemini, Claude Sonnet, Prompt Engineering

Databases: MySQL, MongoDB, PostgreSQL

Projects

AI-Powered Salesforce Loyalty Knowledge Assistant | *FastAPI, React, ChromaDB, Claude Sonnet*

RAG assistant for Salesforce Loyalty Management concepts; indexed domain knowledge into semantic vector embeddings (all-MiniLM-L6-v2) with top-K similarity retrieval, integrated Salesforce LLM Gateway (Claude Sonnet), and built a chat UI with categorized concept navigation.

AI Meeting Intelligence System | *Python, MCP, Google Calendar/Drive API, Gemini*

Multi-agent MCP system that retrieves recurring meeting history from Google Calendar, downloads transcripts from Drive, and generates structured onboarding briefings using Gemini.

Google Sheets Decision Matrix Integration | *Salesforce Industries Hackathon — 2nd Place*

Application enabling direct upload and synchronization of Decision Matrix data from Google Sheets into Salesforce BRE via a Google Sheets plugin, eliminating manual data entry overhead.

Event-Driven Microservices with RabbitMQ | *Spring Boot, RabbitMQ, Docker Compose*

Event-driven Order & Inventory microservices system using RabbitMQ for asynchronous, decoupled processing of inventory reservation and order orchestration workflows.

Education

Netaji Subhas Institute of Technology, University of Delhi

New Delhi, India

B.E. in Computer Engineering

2016 – 2020

CGPA: 8.25 JEE Mains: 222/360, AIR: 997
