EDUCATION

Netaji Subhas Institute of Technology, University of Delhi

New Delhi, India

B.E. in Computer Engineering CGPA: 8.25 JEE Mains: 222/360, AIR: 997

2016 – 2020

EXPERIENCE

Salesforce

Hyderabad, India

Member of Technical Staff

Aug 2022 – Present

- **Loyalty Traceability:** Developed traceability features for loyalty activity currency transactions; implemented point credits with subtype-based negative settlement handling; built member point adjustment with transaction tracking; enabled credit cancellation with expired ledger handling; implemented member-to-group point transfers with extension period support.
- **Loyalty Agentforce:** Built end-to-end AI agents in Salesforce Agentforce to rank loyalty promotions based on dynamic filter criteria and to adjust member currency points with dynamic UI and user inputs.
- **Spidering:** Performed spidering on Expression Sets to auto-include Decision Matrices, Decision Tables, Contexts, and other dependencies during packaging and deployment.
- **Expression Set APIs & Context Definition Integration:** Implemented context definition and tag validations across Expression Set backend, Metadata API, and Connect API; developed CRUD Connect APIs with end-to-end Metadata integration, call rate guardrails, and QA validation.
- **Context Rules:** Designed and developed design-time APIs for rule libraries, rules, and rulesets within the BRE; simulated runtime context rules use-cases for UPS and PCM.
- **BRE Stabilization & Support:** Stabilized BRE Decision Matrix and Expression Set Templates via bug fixes and cross-team blitz sessions; led cloud-wide office hours for effective product query resolution.
- **Decision Table & Expression Set Near Core:** Delivered Sync and Purge functionality with full-stack implementation across Core and Near Core systems; refactored ES runtime execution into a dedicated microservice.

Associate Member of Technical Staff

Feb 2021 – Aug 2022

- **Decision Matrix & Expression Set Clone:** Implemented end-to-end cloning of decision matrix versions and expression sets, including a custom Salesforce LWC modal component, backend processing, and BRE validations.
- **File-Based Rules Support in Salesforce Core:** Built complete support for file-based expression sets using transformation APIs (Metadata API ↔ Connect API) for saving and extracting rules from Salesforce Core.

Infoedge India Limited (Naukri.com)

Noida, India

Software Development Engineer

Aug 2020 – Feb 2021

- **PII Microservice:** Complete system design and implementation for protecting PII in encrypted format using Amazon KMS for envelope encryption.
- **Institutes & Courses REST API:** Created REST APIs for complex queries on courses, institutes, and specializations using advanced data structures.
- **Certification Service:** End-to-end microservice design and implementation including DB schema design and APIs for adding Certifications on Naukri.com user profiles.

PROJECTS

AI-Powered Salesforce Loyalty Knowledge Assistant | *FastAPI, React, ChromaDB, Claude Sonnet*

- Built a RAG assistant to explain Salesforce Loyalty Management concepts, invocable actions, DPE jobs, and business scenarios.
- Indexed a custom JSON knowledge base into semantic vector embeddings using **all-MiniLM-L6-v2** with top-K similarity retrieval for context-aware responses.
- Integrated with Salesforce's internal LLM Gateway (Claude Sonnet); built a chat UI with categorized concept navigation and secure browser-based API key management.

AI Meeting Intelligence System | *Python, MCP, Google Calendar/Drive API, Gemini*

- Built a multi-agent MCP system that retrieves recurring meeting history from Google Calendar, downloads transcripts from Drive, and generates structured onboarding briefings using Gemini.

Google Sheets Decision Matrix Integration | *Salesforce Industries Hackathon — 2nd Place*

- Application enabling direct upload from Google Sheets to BRE Decision Matrix by linking sheets to Salesforce DM via a Google Sheets plugin.

Event-Driven Microservices with RabbitMQ | *Spring Boot, RabbitMQ, Docker Compose*

- Built an event-driven Order & Inventory microservices system using Spring Boot, RabbitMQ, and Docker Compose for asynchronous, decoupled processing.

AI-Enabled Gratitude Journal | *Spring Boot, PostgreSQL, MongoDB, Docker*

- Full-stack journaling application with Dockerized deployment; integrated LLMs to generate personalized prompts enabling guided reflection and conversational journaling.

AI Agents & LLM Integrations | *Google ADK, LangChain, LangGraph, CrewAI, MCP*

- Built CrewAI multi-agent workflows, MCP Weather Server/Inspector, and LLM orchestration demos; hands-on with RAG, LangChain, LangGraph, and Prompt Engineering (DeepLearning.AI).

Slack Cheatsheet | *Salesforce Internal Hackathon — Top 30*

- Slack application for saving and retrieving info/links via slash commands for quick access to frequently used references.

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, HTML/CSS, JavaScript, Dart

Frameworks & Libraries: Spring Boot, Hibernate, Flutter, FastAPI, React, LangChain, LangGraph, CrewAI

Developer Tools: Git, VS Code, Android Studio, Jenkins, JIRA, Docker, Kubernetes

Cloud & Platforms: Salesforce (LWC, Agentforce, BRE, Metadata/Connect API), Google Cloud, Amazon KMS

AI/ML: LLM Integration, RAG, ChromaDB, MCP, Google ADK, Gemini, Claude Sonnet, Prompt Engineering

Databases: MySQL, MongoDB, PostgreSQL
